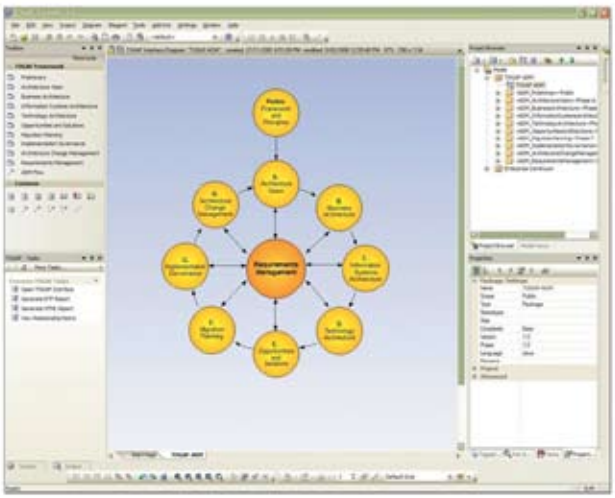
SPARX SYSTEMS

TOGAF®

MDG Technology provides open standards modeling for TOGAF 9

The Open Group Architecture Framework (TOGAF) is one of the most widely accepted methods for developing enterprise architecture, providing a practical, step-by-step approach.



Sparx Systems equips Enterprise Architect users with a model-based framework for implementing architectures using the TOGAF-9 Architecture Development Method. Tightly integrated with Enterprise Architect, MDG Technology for TOGAF extends UML 2.3 to support The Open Group's approach to information systems architecture.

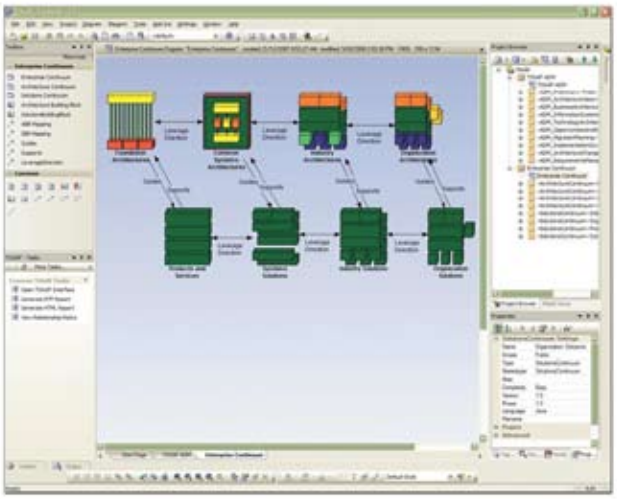
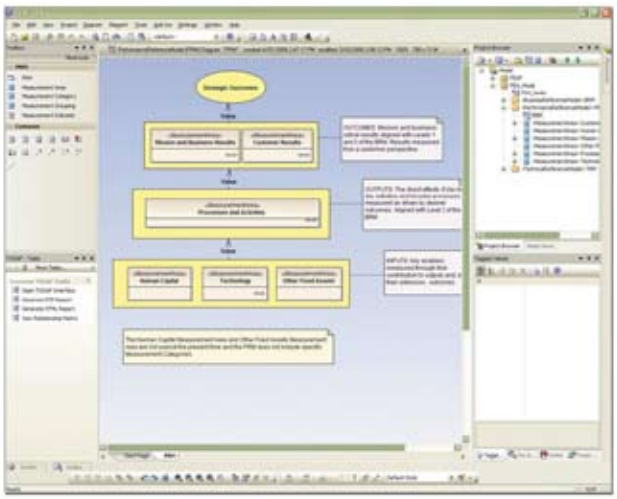
TOGAF®





MDG Technology for TOGAF helps enterprise architects to align business processes and IT systems with strategic enterprise goals under the TOGAF 9 method.

The technology allows practitioners to:

- Implement all phases of the TOGAF Architecture Development Method (ADM)
- Create visual models of As-Is and To-Be architecture
- Model all four TOGAF architecture domains: Business, Application, Data and Technology
- Productively document all TOGAF work Products
- Leverage the Archimate profile built into Enterprise Architect

Features

- A visual clickable interface for the TOGAF ADM
- Support for the latest TOGAF 9 framework
- Detailed model structures to organize TOGAF work products
- Reference models for Federal Enterprise Architecture (FEAF)
- UML Profiles for FEAF Business, Performance, Service and Technical Reference Models
- Extended diagrams for visualizing TOGAF, FEAF and Business Architecture elements
- Support for OMG's Business Motivation Model (BMM) standard
- Out-of-the-box TOGAF 9 Enterprise Continuum model
- Effective management of model dependencies using Enterprise Architect's Relationship Matrix and Hierarchy Views
- Architecture Content diagram support for TOGAF 9's Architecture Content Metamodel
